## Supplier Management as a Service (SMaaS)

### SMaaS, what's is it ?

Supplier Management as a Service is a subscription scheme for service provision. For as long as the subscription plan is active, we're managing and following up on your Suppliers, in compliance with your Standard Operating Procedures.

The higher the subscription plan, the higher the number of monitored suppliers, and the broader the coverage of the Supplier Risk.

### Ensure compliance

Lack of time or resources? Don't be late anymore in the execution of your Supplier Audit program and make sure your company remains compliant.

### Risk-based approach

A pragmatic, risk-based Supplier Qualification Procedure for an appropriate level of risk mitigation.

### Time for what really matters

Save time and keep the focus on value-added tasks: R&D, manufacturing, marketing authorization, ...

### Affordable

Thanks to the subscription scheme.

### Flexible

Start when you need it, stop whenever you want.

### Adjusts to your needs

From occasional support to comprehensive takeover of your Supplier Management.
